

DENE

Convenient Edge  
Finder for Milling Machine

**5761-0005/0010/0015**

## EDGE FINDER

### Description

- Body and contact are made of tool steel, hardened and ground and lapped to close tolerances for diameter and concentricity
- For adjusting basic surfaces or edges
- Ideal for locating work surfaces easily, quickly and accurately
- Useful for identifying center line on jig boring, milling and engraving machines
- Rotational speed of spindle approx 400-600 rpm

### Technical Specifications

Unit:mm

Code	Shank Diameter (A)	Contact Point (B & C)	Accuracy
5761-0005	Ø10	Ø10	0.005
5761-0010	Ø10	Ø10 & Ø4	0.005
5761-0015	Ø10	Ø6	0.008
